

# REPORT ON COOPERATION OF UZBEK STATE UNIVERSITY OF WORLD LANGUAGES WITH GOVERNMENTS ON WATER SECURITY

**Report Preparation Date: May 25, 2023**

The Uzbek State University of World Languages (UzSWLU) cooperates with local, regional, national, and global governments on issues related to water security.

## **Objectives of Cooperation:**

The objectives of UzSWLU's cooperation with governments on water security include:

- Raising awareness about the importance of water security.
- Developing and implementing policies and programs related to water security.
- Researching and developing new technologies and methods in the field of water security.

## **Forms of Cooperation:**

UzSWLU collaborates with governments in the following forms:

- Providing consultations and expert assessments.
- Conducting research and development.
- Training and professional development of specialists.

## **Examples of Cooperation:**

Here are some examples of UzSWLU's cooperation with governments on water security:

- Advised the government of Uzbekistan on the development of a national water security strategy.
- Conducted a study on the impact of climate change on water security in the Central Asia region.
- Organized training courses for water resource management specialists.

Additionally, within the framework of its research activities, UzSWLU may conduct studies dedicated to water resources and ecological issues. For example, Professor Dilrabo Bakhronova of the university has published an article titled "[Water Policy in Uzbekistan: Issues, Solutions, and Proposals](#)," which analyzes issues related to water resource management and their efficient use.

## **Effectiveness of Cooperation:**

The cooperation of UzSWLU with governments on water security contributes to:

- Raising awareness about the importance of water security.
- Developing and implementing effective policies and programs in the field of water security.
- Developing new technologies and methods in the field of water security.

**Conclusion:**

UzSWLU takes significant steps towards its commitment to sustainable development, paying special attention to Sustainable Development Goal 6 (SDG 6) – "Ensure availability and sustainable management of water and sanitation for all."

UzSWLU actively participates in ensuring water security, recognizing the importance of this issue for society. The university not only provides high-quality education in water resource management but also actively interacts with governments of various countries, striving to contribute to the development and implementation of effective strategies for water resource management.

It should be noted that UzSWLU uses its unique knowledge and resources to actively cooperate with international and national authorities, as well as academic and research institutions, to work together on developing innovative solutions in the field of water resource management. The university strives not only to expand its knowledge and experience but also to create long-term and sustainable partnerships to help solve global issues related to water resources and sanitation.

Thus, UzSWLU not only provides education but also actively interacts with global issues, making an important contribution to ensuring sustainable use of water resources and maintaining sanitation for all.
