

Student Support System

A report on the work carried out with disabled and socially vulnerable students will be posted on the website.

In 2024, with the aim of supporting talented, socially active, and socially vulnerable students, **1,840** students were granted financial incentives in the amount of **1 billion 904 million 400 thousand UZS**.

The university covered rental costs in the amount of **10 billion 070 million 211 thousand UZS for 5,683 students**.

During the first quarter of the current academic year, 1,869 students who require special attention—those who are orphans, come from low-income families, or have won competitions and contests—were provided with financial support.

Students who are genuine **orphans or have disabilities** and need housing were allocated places in the university's dormitories and were **100%** exempted from payment for student accommodation.

In addition, in order to improve conditions in the student dormitories and academic buildings, special ramps and walkways were installed, and necessary facilities were provided in restrooms for students with disabilities.
