Umumkasbiy va ixtisoslik fanlaridan davlat attestatsiyasi sinovini o'tkazish tartibi va uni baholash mezonlari

Umumkasbiy va ixtisoslik (chet tillarni o'qitishning integrallashgan kursi, o'rganilayotgan til nazariy aspektlari (leksikologiya, nazariy fonetika, nazariy grammatika, stilistika, o'rganilayotgan til tarixi, qiyosiy tipologiya, tarjima nazariyasi va amaliyoti fanlaridan davlat attestatsiyasi yozma ish shaklda o'tkaziladi. Yakuniy attestatsiya o'tkazish uchun savollar majmuasi attestatsiyadan oldin belgilangan tartibda talabalarga yetkaziladi.

Yakuniy attestatsiya o'quv vazifalariga ko'ra o'tilgan nazariy ma'lumotlar va amaliy malakalarni yakuniy tekshiruv orqali baholashga yo'naltirilgan bo'lishi kerak. Umumkasbiy va ixtisoslik fanlaridan davlat attestatsiyasi tasdiqlangan tartibda yozma va og'zaki vazifalar asosida o'tkaziladi. Talabalar tomonidan berilgan javoblarning har biri tasdiqlangan baholash mezonlari asosida izohlanadi va baho tizimidan kelib chiqib qo'yiladi.

Yakuniy davlat attestatsiyasini o'tkazish uchun namuna sifatida har bir fandan 15 ta namunaviy savol attestatsiyadan oldin talabalarga yetkaziladi. Attestatsiya biletlari 4 ta qismdan tashkil topgan holda muhrlangan konvertlarga solinadi. Biletning birinchi qismi o'qib tushinish kompetensiyasi bo'yicha 10 ta test savoli beriladi. Chet tilidagi ausentik matnni o'qib, matn yuzasidan berilgan savollarning javobini belgilaydi. Ikkinchi qismida yozuv kompetensiyasi baholash uchun berilgan vaziyat yuzasidan xatni yozish topshirig'i beriladi, bu esa o'z navbatida bitiruvchining til o'qitish bo'yicha egallangan bilim va ko'nikmalarini aniqlab beradi, biletning uchinchi

qismida talabaning ogʻzaki nutq koʻnikmasi baholash uchun berilgan mavzular boʻyicha erkin muloqotga kirisha olish va savollarga javob berishi talab etiladi. Toʻrtinchi qismida bitiruvchi nazariy bilimlarga asoslangan 2 ta savollarga yozma javob beradi.

Yakuniy davlat attestatsiyasi ishlarni tekshirish va baholash 5 baholik shkalada amalga oshiriladi. Barcha 4 ta qism boʻyicha berilgan javoblarga qoʻyilgan baholar yigʻib chiqiladi, birinchi qismga 20 ball, ikkinchi qismga 20 ball, uchinchi qismga 40 ball va toʻrtinchi qismga 20 ball beriladi. Ballar shkalasi baho shkalasiga oʻgirilib “5 baho” lik shkalada baholanadi va bitiruvchining fan boʻyicha yakuniy davlat attestatsiya bahosi aniqlanadi.

Variant 1

1. READING

Margaret Preston's vibrant paintings and prints of Australian flowers, animals and landscapes have delighted the Australian public since the early 1920s.

Margaret Preston was born Margaret Rose McPherson in Port Adelaide, South Australia in 1875, the daughter of David McPherson, a Scottish marine engineer and his wife Prudence Lyle. She and her sister were sent at first to a private school, but when family circumstances changed, her mother took the girls to Sydney where Margaret attended a public high school. She decided early in life to become an artist and took private art lessons. In 1888, she trained for several months with Sydney landscape painter William Lister, and in 1893 enrolled at the National Gallery of Victoria Art School, where she studied for just over four years.

In 1898, after her father died, Margaret returned to Adelaide to study and then teach at the Adelaide School of Design. Her early artwork was influenced by the German aesthetic tradition, in which subjects of the natural world were depicted in a true to life manner.

Margaret's first visit to Europe in 1904, and her studies in Paris. France had little impact on this naturalism that dominated her work from this early period. However some eight years later, after returning to Paris, she began to recognise the decorative possibilities of art.

With the outbreak of the First World War, Margaret traveled to England, where she had exhibitions and continued her studies of art. She was a student of pottery, but at some time developed her interest in various techniques of printmaking and design. In England's West Country, she taught basket weaving at a rehabilitation unit for servicemen. It was on board a boat returning to Australia that she met wealthy businessman William Preston, whom she married in 1919. Together Margaret and William settled in the Sydney harbourside suburb

of Mosman. The most characteristic prints from her early years in Sydney are views of boats floating on Sydney Harbour and of houses clustered on foreshore hills. Although Sydney was their home, the couple traveled regularly, both overseas and within Australia.

Her first major showing in Australia was with her friend Thea Proctor, in exhibitions in Melbourne and Sydney in 1925. Many of Preston's prints were hand-coloured in rich scarlet reds, blues and greens, and all of them were set in Chinese red lacquer frames. Harbour views were again prominent, but in comparison with earlier artworks, they were compact and busy, using striking contrasts of black and white combined with elaborate patterns and repetitions. Other prints from this period featured native flora. It was with these still-life subjects that she convinced the public that Australian native flowers were equal in beauty to any exotic species.

From 1932 to 1939, Preston moved away from Sydney and lived with her husband at Berowra, on the upper reaches of the Hawkesbury River. The area was one of rugged natural beauty, and for the first time Preston found herself living in a home surrounded bush. Prior to this, the native flowers that featured in her paintings and prints had been purchased from local florists; they now grew in abundance around her home. Preston's prints became larger, less complex and less reliant on the use of bright colours. Flowers were no longer arranged in vases, and Preston began to concentrate instead on flowers that were growing wild.

While living at Berowra, and undoubtedly prompted by the Aboriginal rock engravings found near her property, Preston also developed what was to be a lifelong interest in Aboriginal art. On returning to Sydney in 1939, she became a member of the Anthropological Society of New South Wales, and later visited many important Aboriginal sites throughout Australia. Preston believed that Aboriginal art provided the key to establishing a national body of art that reflected the vast and ancient continent of Australia.

During the 1940s, symbols used by Aboriginal people, together with dried, burnt colours found in traditional Aboriginal paintings, became increasingly prominent in her prints. The artist's titles from this period frequently acknowledge her sources, and reveal the extent to which she drew inspiration from traditional Aboriginal art to create her own art.

It was in 1953, at the age of 78, that Preston produced her most significant prints. The exhibition at Macquarie Galleries in Sydney included 29 prints made using the ancient technique known as stenciling. Many of the artworks in the exhibition incorporated her fusion of Aboriginal and Chinese concepts. Preston had admired Chinese art since 1915, when she acquired the first of her many books on the subject, and she had visited China on two occasions. Chinese elements may be found in several of her earlier paintings.

However, in her prints of the 1950s, Preston combined Chinese ideas with her understanding of the Dreamtime creation stories of Aboriginal Australians. Preston did not let age alter her habit of working hard. As she got older, her love of painting, printmaking and travel continued. By the time of her death in 1963, when she was 88, she had produced over 400 paintings and prints. In a career spanning almost 60 years, she created a body of work that demonstrates her extraordinary originality and the intensity of her commitment to Australian art.

2. Writing task

You missed an international flight due to a problem at the airport.

Write a letter to the airline. In your letter:

- Describe what happened that caused you to miss your flight
- Explain how missing your flight impacted you
- Clearly state what you would like the airline to do

Write at least 150 words. You do NOT need to write any addresses.

Sample answer

Dear Sir or Madam,

I am writing to express my disappointment regarding a recent experience with your airline. Due to a serious delay at the security checkpoint at Heathrow Airport on April 20th, I missed my international flight, Flight BA467 to New York, which was scheduled to depart at 10:30 AM.

Despite arriving at the airport well in advance, the security process was extremely disorganized, with only two lanes open for hundreds of passengers. Staff members provided little information, and no priority was given to those with imminent departures. As a result, I reached the gate just minutes after it had closed.

Missing this flight had a significant impact on me. I was scheduled to attend an important business meeting the following morning, and because of the delay, I lost a valuable opportunity, incurred hotel costs, and had to reschedule my entire trip at great personal expense.

Given the circumstances, I kindly request a full refund of my ticket and reimbursement for additional expenses I incurred due to the missed flight. I have attached copies of all relevant receipts for your reference.

I look forward to your prompt response and a fair resolution to this matter.

Yours faithfully,

Toshmatov Toshmat

Speaking Part 2

(Individual Long Turn — you speak for 1-2 minutes)

Describe a time when you learned a new skill.

You should say:

- what skill you learned
- how you learned it
- why you decided to learn it
- and explain how you felt about learning it.

One new skill I learned recently was graphic design.

I started learning it about a year ago when I realized that many of my university projects and personal hobbies, like creating social media content, could really benefit from good design skills.

I mainly taught myself by using online resources. I took a few free courses on platforms like Coursera and YouTube, and I practiced a lot using Canva and a bit of Adobe Illustrator. It wasn't easy at first because I had no background in design, and I struggled with understanding things like color combinations, font choices, and layout balance. But over time, by experimenting and learning from my mistakes, I started to get the hang of it. I decided to learn this skill mainly because I wanted to be more independent and creative when presenting my ideas. I didn't want to always rely on others to make visuals for me. Also, I saw that having some design skills could be a huge advantage for my future career, whether in marketing, business, or even education.

Overall, learning graphic design made me feel really empowered. It gave me a new way to express myself creatively, and it also boosted my confidence in taking on new challenges. Now, whenever I create a poster or a presentation, I feel proud knowing that I built that skill from scratch. It was definitely one of the best decisions I made for my personal growth.

Skills and Learning

- Why do people need to learn new skills?
- What are the differences between learning skills at school and learning skills outside school?
- Do you think old people can learn new skills easily? Why or why not?
- What skills will be important in the future?

Why do people need to learn new skills?

People need to learn new skills because the world is constantly changing. Technology, work environments, and even daily life are evolving so fast that if you don't keep learning, you might fall behind. Also, learning new skills helps people stay mentally active, adapt to different situations, and even open new career opportunities. It's really about staying relevant and growing as a person.

What are the differences between learning skills at school and learning skills outside school?

In school, learning tends to be more structured and theoretical. You usually follow a set curriculum, have deadlines, and get grades based on your performance. Outside of school, learning is often more practical and self-directed. You learn at your own pace, usually driven by personal interest or necessity, and you might apply the skills directly in real-life situations, like at a job or while working on a personal project.

Both are important, but the motivation and environment are very different.

Do you think old people can learn new skills easily? Why or why not?

I think it really depends on the individual. Some older people are very open-minded and curious, and they can definitely learn new skills, especially if they are motivated. However, it might take them a bit longer compared to younger people because of factors like slower memory retention or less familiarity with new technologies. But with patience and the right support, they can absolutely succeed.

What skills will be important in the future?

In the future, I think digital skills will be absolutely essential—things like coding, digital marketing, and AI literacy. Soft skills like creativity, critical thinking, and emotional intelligence will also become more valuable, especially because many technical tasks might be automated. Being flexible and able to learn continuously will probably be the most important skill of all.

4 Answer the following theoretical questions

1. Comparative typology of morphological systems

Morphological typology is a way of classifying the languages of the world that groups languages according to their common morphological structures. The field organizes languages on the basis of how those languages form words by combining morphemes. Analytic languages contain very little inflection, instead relying on features like word order

and auxiliary words to convey meaning. Synthetic languages, ones that are not analytic, are divided into two categories: agglutinative and fusional languages. Agglutinative languages rely primarily on discrete particles (prefixes, suffixes, and infixes) for inflection, while fusional languages "fuse" inflectional categories together, often allowing one word ending to contain several categories, such that the original root can be difficult to extract. A further subcategory of agglutinative languages are polysynthetic languages, which take agglutination to a higher level by constructing entire sentences, including nouns, as one word.

Analytic, fusional, and agglutinative languages can all be found in many regions of the world. However, each category is dominant in some families and regions and essentially nonexistent in others. Analytic languages encompass the Sino-Tibetan family, including Chinese, many languages in Southeast Asia, the Pacific, and West Africa, and a few of the Germanic languages. Fusional languages encompass most of the Indo-European family—for example, French, Russian, and Hindi—as well as the Semitic family and a few members of the Uralic family. Most of the world's languages, however, are agglutinative, including the Turkic, Japonic, Dravidian, and Bantu languages and most families in the Americas, Australia, the Caucasus, and non-Slavic Russia. Constructed languages take a variety of morphological alignments.

The concept of discrete morphological categories has been criticized. Some linguists argue that most, if not all, languages are in a permanent state of transition, normally from fusional to analytic to agglutinative to fusional again. Others take issue with the definitions of the categories, arguing that they conflate several distinct, if related, variables.

2. Subdivisions of Lexicology

Distinction is generally made between General Lexicology and Special Lexicology. General lexicology is the general study of words and vocabulary, irrespective of the specific features of any particular language. Special Lexicology studies the description of the characteristic peculiarities in the vocabulary of a particular language.

The evolution of any vocabulary, as well as of its single elements, forms the object of historical lexicology or etymology. This branch of linguistics discusses the origin of various words, their change and development, and investigates the linguistic (relations between language units) and extra-linguistic (political, economic, historical, geographic) factors modifying their structure, meaning and usage.

Closely connected with Historical Lexicology is Contrastive and Comparative lexicology, whose aims are to study the correlation between the vocabularies of two or more languages (e.g., a study on the basis of English, German).

Descriptive lexicology deals with the lexical system of a language as it exists at the present time. It studies the functions of words and their morphological and semantical structures, investigating the interdependence between these two aspects.

Vocabulary of any language can be approached in two basically different ways – the historical or diachronic (Gr *dia* 'through' and *chronos* 'time') and the descriptive or synchronic (Gr *syn* 'together', 'with'). The distinction between a synchronic and a diachronic approach is due to the Swiss philologist Ferdinand de Saussure (1857-1913).

Variant 2

1. READING PASSAGE

The importance of law

A The law influences all of us virtually all the time, it governs almost all aspects of our behavior, and even what happens to us when we are no longer alive. It affects us from the embryo onwards. It governs the air we breathe, the food and drink we consume, our travel, family relationships, and our property. It applies at the bottom of the ocean and in space.

Each time we examine a label on a food product, engage in work as an employee or employer, travel on the roads, go to school to learn or to teach, stay in a hotel, borrow a library book, create or dissolve a commercial company, play sports, or engage the services of someone for anything from plumbing a sink to planning a city, we are in the world of law.

B Law has also become much more widely recognised as the standard by which behavior needs to be judged. A very telling development in recent history is the way in which the idea of law has permeated all parts of social life. The universal standard of whether something is socially tolerated is progressively becoming whether it is legal, rather than something that has always been considered acceptable. In earlier times, most people were illiterate.

Today, by contrast, a vast number of people can read, and it is becoming easier for people to take an interest in law, and for the general population to help actually shape the law in many countries. However, law is a versatile instrument that can be used equally well for the improvement or the degradation of humanity.

C This, of course, puts law in a very significant position. In our rapidly developing world, all sorts of skills and knowledge are valuable. Those people, for example, with knowledge of computers, the internet, and communications technology are relied upon by the rest of us.

There is now someone with IT skills or an IT help desk in every UK school, every company, every hospital, every local and central government office. Without their knowledge, many parts of commercial and social life today would seize up in minutes. But legal understanding is just as vital and as universally needed. The American comedian Jerry Seinfeld put it like this, 'We are all throwing the dice, playing the game, moving our pieces around the board, but if there is a problem, the lawyer is the only person who has read the inside of the top of the box.' In other words, the lawyer is the only person who has read and made sense of the rules.

D The number of laws has never been greater. In the UK alone, about 35 new Acts of Parliament are produced every year, thereby delivering thousands of new rules. The legislative output of the British Parliament has more than doubled in recent times from 1,100 pages a year in the early 1970s, to over 2,500 pages a year today. Between 1997 and

2006, the legislature passed 365 Acts of Parliament and more than 32,000 legally binding statutory instruments. In a system with so much law, lawyers do a great deal not just to vindicate the rights of citizens and organizations but also to help develop the law through legal arguments, some of which are adapted by judges to become laws. Law courts can and do produce new law and revise old law, but they do so having heard the arguments of lawyers.

E However, despite their important role in developing the rules, lawyers are not universally admired. Anti-lawyer jokes have a long history going back to the ancient Greeks.

More recently the son of a famous Hollywood actor was asked at his junior school what his father did for a living, to which he replied, 'My daddy is a movie actor, and sometimes he plays the good guy, and sometimes he plays the lawyer. For balance, though, it is worth remembering that there are and have been many heroic and revered lawyers such as the Roman philosopher and politician Cicero and Mahatma Gandhi, the Indian campaigner for independence.

F People sometimes make comments that characterise lawyers as professionals whose concerns put personal reward above truth, or who gain financially from misfortune. There are

undoubtedly lawyers that would fit that bill. Just as there are some scientists, Journalists and others in that category. But, in general, it is no more just to say that lawyers are bad because they make a living from people's problems than it is to make the same accusation in respect of nurses or IT consultants. A great many lawyers are involved in public law work, such as that involving civil liberties, housing and other issues. Such work is not lavishly remunerated and the quality of the service provided by these lawyers relies on considerable professional dedication. Moreover, much legal work has nothing to do with conflict or misfortune, but is primarily concerned with drafting documents. Another source of social disaffection for lawyers, and disaffection for the law, is a limited public understanding of how law works and how it could be changed. Greater clarity about these issues, maybe as a result of better public relations, would reduce many aspects of public dissatisfaction with the law.

Write the correct letters in boxes 7-8 on your answer sheet.

Which TWO of the following statements does the writer make about legal skills in today's world?

- A There should be a person with legal training in every hospital.
- B Lawyers with experience in commercial law are the most in demand.
- C Knowledge of the law is as important as having computer skills.
- D Society could not function effectively without legal experts.
- E Schools should teach students about the law.

Questions 9-10

Complete the summary below.

Choose **ONE WORD ONLY** from the passage for each answer.

Write your answers in boxes 9-13 on your answer sheet.

Lawyers as professionals People sometimes say that 9 is of little interest to lawyers, who are more concerned with making money. This may well be the case with some individuals, in the same way that some 10 or scientific experts may also be driven purely by financial greed. However, criticising lawyers because their work is concerned with people's problems would be similar to attacking IT staff

2. Writing task

You and your family are moving to another country for work, and you are looking to buy a house there.

Write a letter to a property agent. In your letter:

- Introduce yourself and your family
- Describe the type of accommodation that you hope to find
- Give your preference for the location of the accommodation

Write at least 150 words. You do NOT need to write any addresses.

Dear Sir or Madam,

My name is Sarah Williams, and I will soon be relocating to Sydney with my husband and two young children due to a new job opportunity. We are currently looking for a suitable property to purchase and would greatly appreciate your assistance in finding our new home.

Ideally, we are seeking a three- or four-bedroom house with a spacious living area, a modern kitchen, and a backyard where our children can play. Having a garage and an additional study room would also be a great advantage. Since we plan to settle in for the long term, we are hoping to find a comfortable, family-friendly home that is move-in ready.

In terms of location, we would prefer a quiet, safe neighborhood that is close to good schools, parks, and public transport links. Areas such as North Sydney, Chatswood, or Lane Cove would be particularly ideal for us.

Thank you for your time and assistance. I look forward to hearing from you soon with any available options.

Yours faithfully,
Sarah Williams

3. Speaking

Describe a book that had a big influence on you.

You should say:

- what the book is
- when you read it
- what the book is about
- and explain why it had a big influence on you.

Sample:

One book that had a huge impact on me is "*Atomic Habits*" by James Clear.

I first read it about two years ago, when I was going through a period of feeling a bit stuck in my personal and academic life. I heard a lot of people recommending it, saying it could help with motivation and discipline, so I decided to give it a try.

The book is essentially about how small, consistent changes in your daily habits can lead to remarkable results over time. Instead of focusing on setting huge, overwhelming goals, the author encourages readers to build tiny habits that eventually grow into powerful routines. He explains the science behind behavior change in a way that's really easy to understand, and he shares plenty of practical tips for applying it in everyday life.

This book influenced me deeply because it completely changed the way I approach personal growth. Before reading it, I used to think that success came from making huge efforts or massive sacrifices. But after reading *Atomic Habits*, I realized that real change often comes from doing small things regularly—things that seem almost too easy at first, like reading a few pages a day, waking up ten minutes earlier, or organizing your workspace for five minutes.

Since then, I've applied many of the strategies from the book, and I genuinely feel that I've become much more productive, more patient, and better at staying consistent with my goals. It didn't just teach me how to build better habits; it taught me how to think differently about progress and success in general.

Overall, it's one of those rare books that doesn't just give you knowledge—it actually helps you transform your life if you apply what you learn.

Speaking Part 3

(Discussion questions — deeper conversation)

Books and Reading Habits

- How do books influence people?
- Do young people read books as much as older people?
- What kind of books are popular in your country?
- Do you think reading habits will change in the future?

How do books influence people?

Books can have a powerful impact on people because they often shape how we see the world. They can introduce us to new ideas, cultures, and ways of thinking that we might never experience otherwise. Some books inspire people to change their behavior, pursue a dream, or even develop empathy towards others. I think a good book doesn't just entertain—it leaves a lasting impression and sometimes even changes a person's life.

Do young people read books as much as older people?

Honestly, I think young people nowadays tend to read less traditional books compared to older generations. With smartphones, social media, and short-form content like videos, their attention is often pulled in different directions. However, it's not that they've stopped reading altogether—they might just prefer digital formats like e-books or audiobooks. Older people, on the other hand, seem to enjoy sitting down with a physical book and taking their time with it.

What kind of books are popular in your country?

In my country, fiction books are very popular, especially romance and mystery novels. Recently, there's also been a growing interest in self-help and motivational books, especially among young adults who are looking for personal development. Classic literature is still respected, but it's mostly read by students who are preparing for exams. In general, anything that tells a compelling story or offers practical advice tends to do well.

Do you think reading habits will change in the future?

Yes, I believe reading habits will definitely change even more in the future. As technology continues to evolve, people might shift even more towards digital reading, using apps or devices that make books more interactive or easier to access. Audiobooks might also become even more popular because they fit into busy lifestyles. That said, I think there will always be people who appreciate the feeling of holding a **real book in their hands**, so **physical books probably won't disappear completely**.

4 Answer the following theoretical questions

1. Polysemantic and monosemantic word

Polysemantic words are words that have more than one meaning. For example, the English word "*head*" can mean the top part of the body, a leader of a group, or the front part of something.

Monosemantic words are words that have only one meaning. For example, the word "*oxygen*" refers only to the chemical element and has no other meanings. In language, most common words tend to be polysemantic, while technical or scientific terms are often monosemantic.

2. Affixation. Prefix and suffix

Affixation is one of the most common ways of word formation in English. It means adding special elements, called **affixes**, to a root or base word to create a new word or change its meaning.

There are two main types of affixes:

- **Prefix**: an affix that is added **at the beginning** of a word. Prefixes usually change the meaning of the original word but do not change its part of speech.
 - Example: *dislike* (dis- + like) — "dis-" changes the meaning to "not like."
 - Example: *preview* (pre- + view) — "pre-" gives the meaning "before."
- **Suffix**: an affix that is added **at the end** of a word. Suffixes often change both the meaning and sometimes the grammatical category (like from verb to noun, or noun to adjective).
 - Example: *happiness* (happy + -ness) — "happy" (adjective) becomes "happiness" (noun).
 - Example: *careful* (care + -ful) — adds the meaning "full of care."

Affixation greatly expands vocabulary and helps express new ideas clearly in English and other languages.
